

## **INSTRUCTIONS TO AUTHOR**

### **About the Journal**

***Journal of Advanced Pharmacy Education & Research [JAPER]*** is a research journal of Society of Pharmaceutical Education & Research and published by [SPER Publications and Solutions Pvt. Ltd.](#) It is an international journal published quarterly. Journal of Advanced Pharmacy Education & Research [JAPER] is available in online version.

It is a peer reviewed journal aiming to communicate high quality original research work, reviews, short communications, case report, Ethics Forum, Education Forum and Letter to editor that contribute significantly to further the scientific knowledge related but not limited to the field of Pharmaceutical, health and allied sciences. Articles with timely interest, *in-vivo* studies and newer research concepts will be given more preference.

All articles published in this journal represent the opinion of the authors and not reflect the official policy of the Journal of Advanced Pharmacy Education & Research [JAPER]. All papers are subjected to double blinded peer-review.

### **About the Society**

[Society of Pharmaceutical Education & Research](#) is a scientific, educational and professional non-profit organization committed to promote the highest professional and ethical standards of pharmacy and to work for the growth, development and betterment in the field of pharmaceutical sciences. It is a registered Society under the M.P. Societies act 1973, No. 44 of 1973.

### **Objective**

The objects of the society are cultivation and promotion of the study and practice of pharmaceutical sciences.

To promote social contacts among pharmacists of the country.

To undertake and promote scientific and pharmaceutical research activities related to pharmaceutical sciences

To edit and publish, research journals related to the field of pharmaceutical sciences for nourishing, spreading and promoting the research scholar and academicians.

To arrange seminars, symposia, conferences, lectures and exhibitions to focus on pharmaceutical sciences profession through publications.

To honour eminent academicians, researchers and young scientists engaged for the upliftment of pharmaceutical sciences profession.

### **The Manuscript Submission**

All submissions should be made online through Manuscript Submission & Peer-Review System [***SPER Online***]. New users should first register as new author. Registration is free but mandatory. Once a user is logged onto the site, submissions should be made via the Author Portal. If you experience any problems with your submission or with the site, please contact SPER Online support through the 'Login help' link.

## **The Editorial Process**

*Journal of Advanced Pharmacy Education & Research [JAPER]* considers all manuscripts on the strict condition that they have been submitted only to Journal of Advanced Pharmacy Education & Research [JAPER], that they have not been published already, nor are they under consideration for publication or in press elsewhere. SPER Publications adheres to the Code of Conduct and Best Practice Guidelines set forth by the Committee on Publication Ethics [COPE]. As per these guidelines, failure to adhere to the above conditions will result in the editor-in-chief and SPER publishing an appropriate correction, a statement of retraction, or enacting a withdrawal of the article. In extreme cases, offending authors may be banned from submitting to SPER Publications journals in the future, or reported to their institution's ethics committee.

The journal expects that authors would authorize one of them to correspond with the Journal for all matters related to the manuscript. All manuscripts received are duly acknowledged by the journal.

On submission, editor-in-chief will review all submitted manuscripts initially for suitability for formal review. Manuscripts with insufficient originality, serious scientific or technical flaws, or lack of a significant message, if not prepared as per journals instructions are rejected before proceeding for formal peer-review. Manuscripts that are unlikely to be of interest to the Journal of Advanced Pharmacy Education & Research [JAPER] readers are also liable to be rejected at this stage itself.

Manuscripts that are found suitable for publication in Journal of Advanced Pharmacy Education & Research [JAPER] are sent to two or more expert reviewers. During submission, the contributor is requested to provide names of two or three qualified reviewers who have had experience in the subject of the submitted manuscript. The reviewers should not be affiliated with the same institutes as the contributor/s. However, the selection of these reviewers is at the sole discretion of the editor-in-chief. The journal follows a double-blind review process, wherein the reviewers and authors are unaware of each other's identity. Every manuscript is finally reviewed by the Editor-in-Chief of the journal, who based on the comments from the reviewers takes a final decision on the manuscript. The comments and suggestions (acceptance/ rejection/ amendments in manuscript) received from reviewers are conveyed to the corresponding author. If required, the author is requested to provide a point by point response to reviewers' comments and submit a revised version of the manuscript. This process is repeated till reviewers and editors are satisfied with the manuscript.

Manuscripts accepted for publication are copy edited for grammar, punctuation, print style, and format. Page proofs are sent to the corresponding author. The corresponding author is expected to return the corrected proofs within two days. It may not be possible to incorporate corrections received after that period. The whole process of submission of the manuscript to final decision and sending and receiving proofs is completed online. To achieve faster and greater dissemination of knowledge and information, the journal publishes articles online as '**Articles in Press**' immediately on acceptance.

## **Manuscript preparation**

**The submitted manuscripts that are not as per the "Instructions to Authors" will be directly rejected. Generally, the manuscript should be submitted in the form of two separate files:**

## **[1] First page file (Including cover letter):**

Details to be included in the First page file: Manuscript type, Article Title, Name(s) of the author(s), Affiliation(s) of author(s), Name, Contact details, postal address of corresponding author, Email address(es) of all authors, acknowledgements and Running title. You may include a covering letter in the First page file Maximum file size allowed: 4 MB.

## **[2] Article file:**

**The manuscript must not contain any mention of the authors' names or initials or the institution at which the study was done or acknowledgements.** Page headers/running title can include the title but not the authors' names. Manuscripts not in compliance with The Journal's blinding policy will be returned to the corresponding author. The main text of the article, beginning from article title till References (including tables and figures) should be in this file. Use doc /docx files. Do not zip the files. Tables and images should be incorporated in this file. The pages should be numbered consecutively, beginning with the first page of the article file.

## **Preparation of Manuscript**

Manuscript should be concisely typewritten in double space on standard-sized-paper (8.5" x 11") with 1" margins on all sides. The manuscript shall be prepared in Times New Roman front using a font size 12. The fonts used in the text as well as graphics should be restricted to Times New Roman, Symbol and Zapf Dingbats.

**The prescribed word count for original research article and review articles are up to 3000 words including Article Title, Abstract, Keywords, Introduction, Materials and Methods, Results and Discussion [including Tables and/or Figures], Conclusion, Acknowledgement and References. The pages shall be numbers consequently.**

No abbreviations on acronyms shall be used in the titles or Abstract acronyms except for measurements. All references, figure (Fig.) and tables (Table) in the text shall be numbered consequently as they first appear. Abbreviations like “&” and “etc” shall be avoided in the paper. There shall not be decorative borders anywhere in the text including the title page. These entire MS word document with graphs and illustration pasted in it shall not exceed 4 MB.

## **ORIGINAL RESEARCH ARTICLE:**

An original research article typically should include the following in the order given below:

Article Title

Abstract

Keywords

Introduction

Materials and Methods

Results and Discussion [including Tables and/or Figures]

Conclusion

Acknowledgement

References

**Article Title:**

Article title should be not more than 14 words.

**Abstract:**

Abstract should present the novelty of the study, the main findings, and principal conclusions, not more than 250 words. All the three categories, Review Articles, Original Research Articles and Short Communications should have an Abstract.

**Key words**

No more than six keywords are needed. Words appearing in the title should not be given as keywords. It is desirable to include the alternative words, if any under keywords e.g. the word 'famotidine'. They should be written left aligned, arranged alphabetically in 12pt Times Roman, and the line must begin with the words Keywords boldfaced. A 12pt space should separate the keywords from the affiliations.

**Introduction**

Description of the research area, pertinent background information, and the hypotheses tested in the study should be included under this section. The introduction should provide sufficient background information such that a scientifically literate reader can understand and appreciate the work to be described. Introduction should be precise and a detailed review of literature is not at all required under this section. The specific aims of the project should be identified along with rationale for the specific experiments and other work performed. The introduction must include in-text citations including a few references pertinent to the background and justification for the study.

**Materials and Methods**

Materials and/or subjects utilized in the study as well as the procedures undertaken to complete the work. The methods should be described in sufficient detail such that they could be repeated by a competent researcher. The sources of all major instruments and reagents used (kits, drugs, etc) must be given with parentheses. Illustrations and/or tables may be helpful in describing complex equipment or elaborate procedures. The statistical tool used to analyze the data should be mentioned. All procedures involving experimental animals or human subjects must accompany a statement on ethical approval from appropriate ethics committee along with the Institutional Animal Ethics Committee (IAEC) approval number.

**Results and Discussion**

Data acquired from the research with appropriate statistical analysis described in the methods section should be included in this section. The results section should highlight the important results obtained. Data should be organized into figures and tables. Qualitative as well as quantitative results should be included, if applicable.

Discussion section should relate the results section to current understanding of the scientific problems being investigated in the field. Description of relevant references to other work/s in the field should be included here.

### **Tables**

All tables must be numbered consecutively (1, 2, 3 etc) and be cited in the text. Titles should be short but descriptive. Each table should have a legend and/or footnotes identified by superscripts a, b, c, etc. Do not use vertical lines and keep horizontal rules to a minimum. In tables, the units are usually in brackets following the quantity, and the font should be Times New Roman and font size of 10.

### **Figures**

Figures (photographs, drawing, diagrams and charts) are to be numbered in one consecutive series of Arabic numerals [1, 2, 3 etc.] in the order in which they are cited in the text.

### **Formula and equations**

Structural and chemical formula, process flow diagrams and complicated mathematical expressions should be very clearly presented. All subscripts, Greek letters and unusual characters must be identified. Structural and chemical formulae as well as process flow diagrams should be prepared in the same way as graphs.

### **Conclusion**

This section allows the author to discuss the significance of the results - i.e. does the data support the hypotheses you set out to test? This section should end with new answers/questions that arise as a result of the author's work.

### **Acknowledgements**

Those who have helped the authors carry out the study and/or prepare the manuscript but have not made significant intellectual contribution to deserve authorship must be acknowledged. Mention all applicable grants and other funding that supported the work.

### **Conflicts of Interest/ Competing Interests**

All authors of submitting manuscript to the journal must disclose any and all conflicts of interest they may have with publication of the manuscript or an institution or product that is mentioned in the manuscript and/or is important to the outcome of the study presented. Authors should also disclose conflict of interest with products that compete with those mentioned in their manuscript.

### **References**

Responsibility for the accuracy of bibliographic citations lies entirely with authors. Citations of literature in the text must be presented in numerical order and a separate Reference List should be supplied. Type reference numbers in square brackets after punctuation mark and do not use superscripts.

### **In-text citation Correct / Acceptable Format**

Respiratory tract infection is one of the most important infectious diseases worldwide. This infection is the leading cause of morbidity and mortality in critically ill patients in developing

countries. [1] Respiratory tract infections (RTIs), which involve the upper or lower respiratory tract, frequently occurs after birth. [2, 3] RTIs, such as sore throat, earache, laryngitis, common cold, otitis media, sinusitis, and mastoiditis, are the most frequently-occurred infections of all human diseases and have been frequently documented. [4-9]

### **Incorrect / Not accepted**

Respiratory tract infection is one of the most important infectious diseases worldwide. This infection is the leading cause of morbidity and mortality in critically ill patients in developing countries [1, 2, 3]. Respiratory tract infections (RTIs), which involve the upper or lower respiratory tract, frequently occurs after birth. [5] RTIs, such as sore throat, earache, laryngitis, common cold, otitis media, sinusitis, and mastoiditis, are the most frequently-occurred infections of all human diseases and have been frequently documented (6, 7).

#### REVIEW ARTICLES:

It is expected that these articles would be written by individuals who have done substantial work on the subject or are considered experts in the field.

The prescribed **word count** is up to **3000 words** including Article Title, Abstract, Keywords, Introduction, Background [including Tables and/or Figures], Conclusion and References. The manuscript may have about 20-30 references.

Authors submitting review article should include a section describing the methods used for locating, selecting, extracting, and synthesizing data. These methods should also be summarized in the abstract.

The journal expects the contributors to give post-publication updates on the subject of review. The update should be brief, covering the advances in the field after the publication of the article and should be sent as a letter to editor, as and when major development occurs in the field.

#### CASE REPORTS:

New, interesting and rare cases can be reported. They should be unique, describing a great diagnostic or therapeutic challenge and providing a learning point for the readers. Cases with clinical significance or implications will be given priority. These communications could be of up to **1000 words** and could be supported with up to 10 references. Case Reports could be authored by up to four authors and should have the following headings: Abstract (structured), Key-words, Introduction, Case report, Discussion, Reference, and Tables and Legends in that order.

**LETTER TO THE EDITOR:**

These should be short and decisive observations. They should preferably be related to articles previously published in the Journal or views expressed in the journal. They should not be preliminary observations that need a later paper for validation. The letter could have up to **500 words** and 5 references. It could be generally authored by not more than four authors.

**Other:**

Editorial, Guest Editorial, and Commentary are solicited by the editorial board.

**Protection of Patients' Rights to Privacy**

Identifying information should not be published in written descriptions, photographs, sonograms, CT scans, etc., and pedigrees unless the information is essential for scientific purposes and the patient (or parent or guardian, wherever applicable) gives written informed consent for publication. Authors should remove patients' names from figures unless they have obtained written informed consent from the patients. When informed consent has been obtained, it should be indicated in the article and copy of the consent should be attached with the covering letter.

**Sending a revised manuscript**

The revised version of the manuscript should be submitted online in a manner similar to that used for submission of the manuscript for the first time. However, there is no need to submit the "First Page" or "Covering Letter" file while submitting a revised version. When submitting a revised manuscript, contributors are requested to include, the 'reviewers' remarks along with point to point clarification at the beginning in the revised file itself. In addition, they are expected to mark the changes as underlined or colored text in the article.

**COPYRIGHT GUIDELINES FOR AUTHORS:**

The entire contents of the Journal of Advanced Pharmacy Education & Research [JAPER] are protected under Indian and international copyrights. The Journal, however, grants to all users a free, irrevocable, worldwide, perpetual right of access to, and a license to copy, use, distribute, perform and display the work publicly and to make and distribute derivative works in any digital medium for any reasonable non-commercial purpose, subject to proper attribution of authorship and ownership of the rights.
